6.3% of households have an animal not listed.

**3.7%** of households have at least one bird.

1.7% of households have at least one horse.

**0.8%** of households have at least one guinea pig.

# **Biggest Concerns About Moving with Pet(s)**

### **Before the Move**

- Schedule a checkup with your pet's vet and stock up on medications.
- Gather all copies of medical, vaccination and prescription records if seeing a new vet.
- Research any breed restrictions or pet requirements in the new area.
- Take a tour of the prospective neighborhood to determine whether pets will be safe.
- ✓ Look for unattended or aggressive dogs and other possible dangers.
- Bear in mind how the stairs, backyard and other factors will affect your pet.

- Ensure your pets are microchipped and fitted with collars and ID tags.
- Address car sickness with vet-approved medications and feeding recommendations.
- Reserve pet-friendly hotel rooms if traveling long-distance.
- Acclimate your pets to being in a crate in the time leading up to the move.

# **During the Move**

- Confine your pet in the crate or in a closed room on moving day to reduce stress.
- Consider using a vet-approved sedative, pheromones or another calming product.
- Pack a box of pet essentials and keep it close at hand.
- Load your pet into the vehicle last.
- Transport cats, small dogs and other small animals in appropriate pet carriers.
- Keep larger dogs leashed or in a well-fitted harness at all times.
- Never put a pet in an open truck bed, closed trunk or storage area of a moving van.
- Secure the pet with a seatbelt buckle rather than letting it roam freely in the vehicle.
- Plan for frequent stops for fresh water and potty breaks.
- Hire a moving crew to take care of the heavy lifting so you can focus more on your pet.

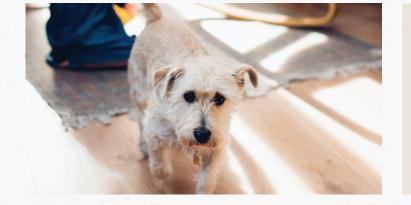

### **After the Move**

- ✓ Introduce the pet to the other rooms gradually once settled.
- Relocate the litter box to its permanent location over time.
- Pet-proof your new home while cleaning up any debris and cleaning supplies.
- Allow the pet to adjust to the new home by starting in just one room.
- ✓ Furnish this "comfort zone" with favorite toys, water and food bowls, a litter box, etc.

Be prepared for an accident in the house as your pet adjusts to the new environment.

- Update your pet's microchip and tags with the new address.
- Watch for unusual behavior or lasting signs of anxiety.

Get back into your old routine ASAP.

Give your pet extra attention to help it feel comfortable and more at home.
